

2010 Bloom Watch

Average Peak Bloom Date: April 4

2010 Peak Bloom Date Forecast:

April 3 through April 8

**2010 Blooming Period: March 31
through April 11**

Update 03/24/2010

The National Park Service has moved up its prediction of the peak bloom period for Washington's famous cherry blossoms, due to our recent warm weather. They anticipate the blossoms starting this weekend, March 26th – 28th and continuing through Saturday, April 9th.
